

AquaCare

Zetasafe

AquaCare use a web-based Legionella compliance program called ZetaSafe to support you in meeting your regulatory duty of care.

As part of the HSE's ACoP L8 Approved Code of Practice, each building must have its own logbook to record actions taken to manage the risk of Legionnaires' disease within the estate or complex. Often in paper format, these logbooks are susceptible to damage, loss and incorrectly entered entries.

ZetaSafe is a powerful and user-friendly cloud based water hygiene compliance solution. It's aimed at improving the operational effectiveness, accountability and profitability of H&S engineers whilst providing the analyses, alerts and reports you need to ensure you're meeting your duty of care.

It includes:

- Manage the status of your assets and monitor your compliance via your personalised dashboard on your tablet or PC.
- Information which is accessible 24/7 for intelligent analysis.
- Custom dashboards, automated email notifications and streamlined workflows which are easy to set up, saving you time and helping you get more value from your data.
- Highlighting trends and priorities, creates reports and simplifies scheduling.
- Consolidation of data and trends across multiple sites, giving you visibility across your entire portfolio of sites.
- User roles and permissions so you can control how your team works with your data, specifying who can view what information, who can make changes and more.

AquaCare WMS

ZetaSafe improves communication between contractors and identifies priority risks for remedial works, streamlines administrative processes and ensures complete peace of mind that all works have been carried out – with a full audit trail.

It has been used throughout the UK to manage the risks of Legionnaires’ disease at universities, local authorities, MOD sites, manufacturing plants, NHS Trusts and Estates – in fact, anywhere that needs ACoP L8 compliance and HTM 01-04 (NHS). By giving you and your business:

- Peace of mind regulatory compliance with accuracy and security
- Paperless secure document management for reports and certificates and audits
- Improved productivity and accountability of your – or your contractors – H&S Engineers
- Provides out of specification alerts.

We are accredited by the following organisations:
