

AquaCare

Commercial Heating

We specialise in large, commercial heating projects. All our engineers are directly employed and are Gas Safe registered. Collectively they have over 100 years of experience in service, repair, installation and general maintenance to heating and hot water systems.

We're part of the Pennon Group – a FTSE 250 company, so you know you're in reliable hands!

Our engineers undertake regular, rigorous health & safety training to ensure our high exemplary standards and reputation are maintained.

Our customers include schools, civic buildings and hotels, but we can help any commercial customer with their heating system.

All work is competitively priced, guaranteed and a complete after care service is also provided.

Some of our core services include:

Gas servicing

You need to keep all of your gas appliances regularly serviced so they are legal and safe for your staff and customers. We service gas boilers and fires and carry out annual Landlord Gas Safety Certificates.

Pump replacements

We can replace old heating pumps with more efficient and powerful ones.

AquaCare WMS

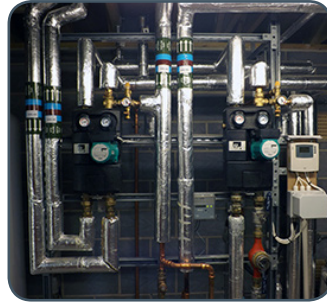

Heating remedial work

We repair boiler faults, leaking radiators, burst pipes, defective radiator valves and replace old steel pipes with new.

Plant rooms

We pride ourselves on refurbishing large commercial plant rooms. We remove old boilers and replace them with high performing, energy-efficient boilers which will reduce your heating bill as well as help you with your green credentials. And all of this whilst maintaining your heating and hot water system to avoid any inconvenience.

Some of our recent projects

Don't just take our word for it!

When Bournemouth School suffered a winter heating pipe failure, AquaCare came up with a repair plan that saw work completed rapidly, without the need to close the school – and costing less than expected.

“AquaCare were brilliant from the outset and came and surveyed and offered a complete solution within two weeks. Even better for us was that the job actually came in at below the expected cost and we were able to modify our heating controls to make it run more efficiently within the price.

“I would not hesitate in recommending AquaCare for any works. The levels of workmanship are high and carried out efficiently and their staff are well informed.

- Mr Player, Site Manager, Bournemouth School
